## EXPERIENCE

### Freelance — Developer

2025 - PRESENT

Delivered custom web apps for clients end-to-end — from architecture to deployment. Known for clean, scalable code and a fast, collaborative development process.

### Sadeiq — Full-Stack Engineer

2024 - 2025

Led full-stack development using Next.js, Tailwind, and Convex to build a scalable real-time web app. Collaborated across partners to design intuitive UIs and implement robust backend APIs supporting core product features.

### Melody Concept — Backend Engineer

2023 - 2024

Built secure backend systems for client websites using Django and PostgreSQL. Integrated CMSs and third-party APIs while translating design and business needs into custom solutions.

## EDUCATION

### University of Toronto, ST George — Honors Bachelor of Science

2020 - 2024

## PROJECTS

### E-commerce Platform —

Developed a robust e-commerce platform utilizing Next.js for frontend and backend, and Prisma for database operations. Integrated with both SQL and NoSQL databases for efficient data management.

### Cross-Platform App —

Built a cross-platform mobile application using React Native, providing a seamless user experience across iOS and Android platforms with a realtime database update.

### AI-Powered Discord Bot —

Created a comprehensive Discord bot powered by AI capabilities to have a human-like chat with its users. Implemented various tools for image/audio manipulations, as well as, many tools and fun minigames/activities.

### Social Media Automation —

Developed automation scripts in Python for automating various tasks on social media platforms, streamlining content management, posting automatically through all platforms and engagement processes.

### Real-time Listing Website —

Designed and engineered a real-time product listing web app with a responsive, SEO-friendly design, integrated chat, strong security, and scalable clean code. Features include localization (RTL support), filtering, search, pagination, and image optimization.

## SKILLS

### Modern Technologies

### Version Control

### API Development

### Research

### Data Analysis

### Collaboration

### Problem-Solving

### Communication

### User Experience

## TOOLS

### Programming languages

- Python
- TypeScript
- Java
- C++
- Rust

### Frameworks & Libraries

- Django
- FastAPI
- React + Next.js
- TailwindCSS
- Bun
- PostgreSQL
- SQLite
- Elysia
- Three.js
- Motion

## AWARDS

### Google Certificate

Android App Development  
Cybersecurity

### W3Schools Certificate

Full-Stack Web Design

## LANGUAGES

Arabic | English
