## EXPERIENCE

### Freelance — *Developer*

2024 - PRESENT

Working as a freelancer, providing web apps for customers.

## EDUCATION

### University of Toronto, ST George — *Honors Bachelor of Science*

2020 - 2024

## PROJECTS

### E-commerce Platform —

Developed a robust e-commerce platform utilizing Next.js for frontend and backend, and Prisma for database operations. Integrated with both SQL and NoSQL databases for efficient data management.

### Cross-Platform App —

Built a cross-platform mobile application using React Native, providing a seamless user experience across iOS and Android platforms with a realtime database update.

### AI-Powered Discord Bot —

Created a comprehensive Discord bot powered by AI capabilities to have a human-like chat with its users. Implemented various tools for image/audio manipulations, as well as, many tools and fun minigames/activities.

### Social Media Automation —

Developed automation scripts in Python for automating various tasks on social media platforms, streamlining content management, posting automatically through all platforms and engagement processes.
