SUMMARY

Full-Stack Engineer with 3+ years shipping production-grade products across real-time platforms, automation systems, AI-integrated apps, and consumer-facing web experiences. Owns the full stack — from database design to polished UI — and consistently delivers systems that are fast, scalable, and built to last.

EXPERIENCE

Stellar Glaze — AI Systems Engineer

2025 - PRESENT

- Built autonomous AI agents (LangGraph + Agno + OpenAI/Ollama) that automate lead-gen, research, and customer workflows - 40% higher task success.
- Architected a multi-agent RAG system (Pinecone + MCP) that automated social media content scheduling, engagement tracking, and analytics.

Sadeiq — Full-Stack Engineer

2024 - 2025

- Engineered real-time collaborative listing platform (Next.js + Convex) for 50K+ concurrent users - reduced synchronization latency by 40%.
- Delivered REST APIs that improved data retrieval 30%; shipped intuitive UIs that raised engagement 15%.

Melody Concept — Backend Engineer

2022 - 2024

- Led backend development of Django/PostgreSQL systems, collaborating closely with frontend and design teams to ensure seamless integration.
- Coordinated with content and marketing teams to integrate CMS & 3rd-party APIs, cutting content update time by 60%.

EDUCATION

University of Toronto — Computer Science (HBSc)

2020 - 2025

PROJECTS

Marifaty — Ongoing

LMS with role-based dashboards (student, teacher, org, admin) with fully scoped data access, OTP/email auth, rate limiting, and a full course builder for teachers. Real-time chat and live course state via Convex; explore page with advanced filtering and search; Stripe payments with webhooks and subscription-gated access.

Labelha

Real-time configure-to-order system (size, material, finish, quantity) with instant pricing — replaced manual quoting workflows end-to-end. Supabase (RLS), Cloudflare R2 presigned uploads, and Resend transactional emails on a Next.js 16 + Bun stack. Perfect Lighthouse score of 100 alongside GSAP animations and smooth scrolling.

SKILLS

Programming

- Python
- TypeScript
- Java
- C++
- Rust
- SQL

Frontend

- React
- Next.js
- TailwindCSS
- Motion
- Three.js

Backend

- Convex
- Django
- Node

Database

- PostgreSQL
- MongoDB
- SQLite

AI

- LangChain
- Agno
- Ollama
- MCP

DevOps

- Docker
- Bun
- CI/CD (Github)
- AWS
- Netlify/Vercel

LANGUAGES

- English (Fluent)
- Arabic (Fluent)

CERTIFICATES

Google Certificates

- Android App Development
- Cybersecurity
- Data Analytics
